## QUEEN MIRA INTERNATIONAL SCHOOL

**DR.SUDHA GOVINDSWAMY**  
Affiliated CIS Consultant

Our school which is affiliated by the National Curriculum aims at providing our students with knowledge, skills and abilities to pursue their lives as global citizens through a high quality international education. So, to understand whether we are on the right track of educating our children towards this global goal we opted to undergo a rigorous external evaluation by subjecting our systems and operations to the audit of a well structured governing body-Council of International Schools (CIS)

When it came to taking up a support of a CIS Affiliated Consultant, Dr.Sudha Govindswamy, an outstanding strategic expert and curriculum designer proved to be our right preference. She is a passionate and inspiring advocate for helping educators to embed global education competencies such as intercultural awareness and understanding, social justice and sustainability into their curriculum.

Team QMIS is associated with Dr.Sudha Govindswamy for the past 6 months. She has been providing us with highly strategic, insightful, and actionable recommendations that enable us to make immediate and consistent improvements in our school management plans, educational practices as well as student well being and safety measures. Dr.Sudha provides our staff with a plethora of resources and ideas which makes the task of internationalizing our units of work so much easier. Her knowledge and expertise in global education and staff professional learning is engaging, thought provoking and professionally rewarding.

Dr.Sudha has been integral to the success of the grant of CIS Membership for our School. Her sage counsel input and direction was instrumental in obtaining this most awaited Membership and is now hard-pressed us to the next target of achievement – CIS Accreditation.

Our association with Dr.Sudha Govindswamy is a rewarding learning experience. Her consulting proves to be the tune up we need to improve our standards for providing a global identity to our QMISians.
